S.13-3. A Resolution Calling Upon Tufts University to Divest its Endowment from the Top 200 Publicly Traded Fossil Fuel Companies

WHEREAS the leaders of 167 countries (including the United States) have agreed that any warming of the planet above 2°C (3.6°F) would be unsafe, and we have already (as of 2012) raised the average surface temperature 0.8°C, causing far more damage than most scientists expected;¹

WHEREAS according to the Carbon Tracker Institute, the proven coal, oil, and gas reserves of the top 200 fossil-fuel companies, and countries (e.g. Venezuela or Kuwait) which act like fossil-fuel companies, equals about 2,795 gigatons of CO₂, or five times the amount we can release to maintain a 2°C limit of planetary warming²;

WHEREAS research sponsored by 20 governments around the world suggests that climate change is already causing 400,000 deaths per year, and fossil fuel usage is expected to cause 100 million deaths over the next 18 years³;

WHEREAS the conditions resulting from climate change disproportionately affect communities of color and low-income communities, and these are the communities who have done the least to cause it, and as a University we must ensure social and racial justice by doing all we can to mitigate climate change⁴;

WHEREAS several other colleges have already divested from fossil fuels, such as Unity College, Sterling College, and Hampshire College, and others such as Middlebury, Swarthmore College, and twenty other Universities have entered into formal processes to consider divestment, and Harvard passed a student resolution where 72% of students voted in favor of divestment⁵;

WHEREAS Seattle has announced it will divest its 1.9 billion dollar pension fund from fossil fuels⁶;

WHEREAS over 1,100 students and 190 alumni have signed a petition calling on Tufts to divest;

WHEREAS Carbon Tracker observes that there is a valid and strong risk of stranded assets in the fossil fuel industry, since only 20% of the world’s fossil fuel reserves can be burned if we were to stay below 2°C; we are living in an age of a carbon bubble, where fossil fuel markets are overcapitalized; 

WHEREAS an industry paper published by Tufts alumnus and investment professional Michael Kramer states "it is imprudent — perhaps even a breach of fiduciary responsibility — to bet on the long-term financial viability of the fossil-fuel industry";

WHEREAS numerous financial experts have concluded that it is possible to divest from fossil fuels and still earn strong returns and an industry study by Aperio Investment Management found that the theoretical risk to return from fossil fuel divestment is .0044%;

WHEREAS investment experts have acknowledged that divestment is possible for large institutions, even ones using commingled funds;

WHEREAS Tufts’ vision statement states that “as an institution, we are committed to improving the human condition”;

WHEREAS former Secretary-General of the United Nations, Kofi Annan, stated “climate change...is the greatest emerging humanitarian crisis of our time”;

WHEREAS President Monaco formed the President's Council on Sustainability, stating “At Tufts, we take pride in our vibrant tradition of active citizenship. One strong part of that heritage is a commitment to environmental sustainability”;

WHEREAS Tufts was instrumental in writing The Talloires Declaration, which states “university leaders must initiate and support mobilization of internal and external resources so that their institutions respond to this urgent challenge [of greenhouse gas emissions]”;

BE IT RESOLVED that the Tufts Community Union (TCU) Senate calls upon the Board of Trustees to immediately stop any new investment in fossil fuel companies; and to ensure that within five years none of its directly held or commingled assets include holdings of either public equities or corporate bonds in fossil fuel companies as determined by the Carbon Tracker list;

BE IT FURTHER RESOLVED that the TCU Senate urges the President and Board of Trustees to prepare a report and options for investing the endowment in a way that further maximizes the positive impact of the fund by seeking out investments in opportunities to limit the effects of burning fossil fuels or help to mitigate its effects including, but not limited to, clean technology, renewable energy, sustainable companies or projects, and sustainable communities;

BE IT FURTHER RESOLVED that the TCU Senate urges the President and Board of Trustees to release bi-annual updates, available to the public, detailing progress made towards full divestment.

Passed 24-1-0 on 10 February 2013.
